

IN THE RUN-UP TO THE 10TH GLOBAL PETER DRUCKER FORUM
management . the human dimension
VIENNA, NOVEMBER 29 - 30, 2018

ADVANTAGE AUSTRIA Paris and the Drucker Forum are pleased to extend a

PERSONAL INVITATION
to a stimulating debate on

**ARTIFICIAL
INTELLIGENCE**
ENSLAVING OR LIBERATING US?

PARIS, JUNE 12, 2018 / 6:00 PM

Artificial intelligence (AI) has left the calm of research labs and turned into a topic, on which human society sees its future hinging. The applications of AI seem enormous given its estimated potential to replace humans in many tasks.

AI and big data will revolutionize how we work, manage organizations and build our society. The crucial question thus becomes how we can shape the relationship between artificial and human intelligence, between computers and humans.

JOIN US TO DISCUSS WITH A PANEL OF DISTINGUISHED EXPERTS
